16 oz*

Paragon's distinctive line of poppers and carts, designed to compliment home interiors and constructed to stand up in the most demanding commercial environment.

8oz machine on medium stand

- Incorporates all Theater Pop line features and functions.
- Commercial grade stainless steel parts used throughout for a great look, enhanced corrosion resistance, and long lasting durability.
- Simple, elegant labeling and lighted red switches provides distinctive home styling while retaining commercial functionality.
- Highlight the popper with a specially matched cart or stand. The high-performance *textured* powder coat finish and stainless steel signature-style plate adds a formality to this popper that completes the look.
- Comes with Paragon's exclusive lifetime warranty on home usage (4 oz machine only) and 3-year warranty on all other machines for all uses.

*You will need a NEMA Style 5-30R Outlet for this machine.

4oz machine on small pedestal stand

Multiple Market Applications

HOMES

Home Theaters. Game Rooms. Offices

The classic styling of this equipment blends and compliments almost any interior design. With many home entertainment areas emphasizing warm woods and leathers, this product is a perfect choice. It will not be "loud" and "out of place", but at the same time will be noticed and impress with its simple elegance. The new pedestal stand is a great option to add style, storage convenience, and space management. Paragon's exclusive home use lifetime warranty on the 4 oz popper offers customer's unmatched comfort in quality.

CONCESSION

Stands. Events. Rental

The long-lasting durability and corrosion resistance that stainless steel construction provides adds incredible value at a surprising low cost. Paragon's 3-year commercial warranty is the longest in the industry. It speaks for itself regarding our quality.

manufactured fun

PARAGON

SCHOOLS

High School. College. Leagues

Paragon's *School Color Program* offers 22 two-color personalizations of the popcorn labels on these poppers at no extra cost. What a way to say "we support your school" in your local market. Combine this with our low cost, unmatched warranty, and commercial durability you have a superior and unique product to represent in your market.

Paragon Popcorn Equipment Standards

High-output, Hard-coat Anodized Aluminum Kettle.

All of our poppers feature this kettle for optimum performance and easy cleaning. We only use aluminum because it has the highest heat transfer rate of any approved cooking material. Then we hard-coat anodize the kettles to create a non-stick surface that resists carbon build-up and is a snap to clean—just wipe with a damp cloth.

Side-hinged Kettle.

Our kettles are simple to operate and maintain. This design facilitates routine cleaning because you can reach all parts of the kettle. Just wipe it with a damp cloth regularly and you'll eliminate most of the baked-on carbon that is so common in oil-based cooking appliances. With less carbon build-up, your machine will heat faster and work more efficiently. Ordinary poppers with center pivot kettles build up baked-on carbon quickly and require time-consuming, difficult disassembly for cleaning.

Built-in Warming Deck.

Professional series poppers incorporate a 50-watt heating element underneath the bottom tray. Since heat rises, bottom heating is better than heat lamps that only warm the top layer of popcorn. Our bottom-heating element keeps all the popcorn in the cabinet warm at the ideal serving temperature. Depending on the humidity level, popcorn can stay fresh all day if kept at the right temperature.

Old Maid Drawer.

A stainless steel drawer built into the base of the popper collects the unpopped kernels, or "old maids". The small holes in the tray allow the old maids to fall through, while keeping the fully popped corn in the serving cabinet. It's simple to remove the drawer for emptying and cleaning.

Presentation Lamp.

A 50-watt R20 lamp bulb lights the cabinet interior and highlights the popped corn. The light also provides extra safety and convenience because the operator can see the kettle clearly for loading and unloading.

Professional Series Features

Stainless Steel Construction.

Components with a powder coat finish on our other lines of equipment have been upgraded with commercial grade stainless steel (finish style—F4). The result is improved durability to scratching and wear, and increased corrosion resistance. This line is perfect for applications where the machine is subjected to constant cleaning or a salt-water environment (coastlines). The life of these machines are extended dramatically as the risk of moisture penetration in powder-coated finishes is eliminated.

Special Design Features.

Our popcorn labels have been moved to the glass on these poppers and designed with black/silver colors to not detract from the classic appearance of stainless. A touch of color and class is present in the lighted, red switches that feature simple, non-obtrusive labeling. The matching carts and stands feature a special textured black powder-coat finish that contrasts and compliments the machine perfectly. This design results in a classic, elegant look that will enhance the most up-scale room, while maintaining the same high-end commercial quality in home use or commercial concession environments.
